

Analyst – Environmental Markets

Powerex Corp., the wholly owned energy marketing subsidiary of BC Hydro, has a full-time regular opportunity for an Analyst to join our Environmental Markets team. A high-energy atmosphere, fun and highly talented teams and competitive compensation package are only a few of the many great things that help make Powerex an exciting and enjoyable place to work. We offer that “something different” to fulfill your ambitions; stimulate your intellect, while empowering you with the tools to accomplish the extraordinary, everyday.

If you are team-oriented, able to “make things happen”, demonstrate strong interpersonal, analytical and problem-solving skills, we want to hear from you! This position will be relied upon to assist in building our people capacity and support the achievement of our purpose and long-term goals by fostering our values: accountability, integrity, teamwork, service and safety.

Reporting to the Director, Environmental Markets you will be responsible for developing trading strategies and researching new opportunities in the tradable markets for Renewable Energy, Carbon, NOx, SO2 and other environmental markets. Additionally, you will provide analysis of new markets including supply/demand modeling, and analysis in support of regulatory efforts. Key duties include:

- identifying market opportunities and working with the Director, Environmental Markets to manage and optimize the green energy certificates and emissions portfolio;
- qualitative and quantitative analysis of the evolving environmental policy landscape, as well as synthesis of external research reports and development of internal market reporting;
- assisting in product development, deal structuring and customer research for custom marketing transactions;
- generating and tracking renewable energy certificates, and working with back/middle office on portfolio reporting;
- preparing weekly Environmental Market pricing and activity reports.

Successful candidates must possess demonstrated skills and abilities in the areas of economic modeling, forecasting, and policy analysis. They will be expected to develop (and enhance/customize those developed by others) economic models relating to environmental markets, energy markets, and renewable energy project development.

The successful candidate will be expected to develop an appreciation of the dynamics of the entire energy complex as they relate to the environmental markets. A background in analysis of energy markets would be an asset. Candidates must be willing to travel and this position may involve working outside normal working hours/days.

We are looking for a self motivated individual focused on achieving success in a dynamic and fast paced team environment. The successful candidate must possess a degree in Engineering, Finance, Mathematics/Physics, Economics or a Policy oriented degree with substantial quantitative experience. An MBA, CFA or analytical Masters Degree is an asset.
